

# Airline Connectivity has never been so easy

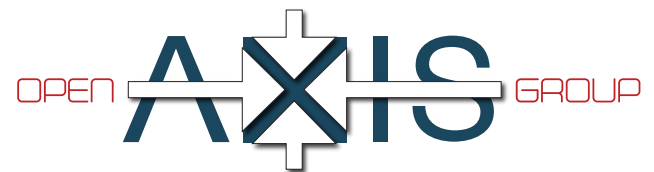

Expanded Airline Distribution  
Comprehensive XML Standard  
Designed for the Agency Channel

## Welcome to Open AXIS Group

Open AXIS Group promotes and advocates for XML as the optimal electronic messaging structure for airline system connectivity used in traveler-authenticated content distribution.

Founded by several of the world's leading airlines and ATPCO, Open AXIS Group maintains a standardized set of XML schema and distribution practices, known as Distribution 2.0, tailored to the airline industry and capable of delivering comprehensive content and functionality for use by the third party distribution channel worldwide.

Airline XML Integration Standards

# Open AXIS Group XML Standard

The Open AXIS Group Standard supports comprehensive air reservation booking and servicing functionality, as well as new merchandising and optional services functions.

## Recently enhanced capabilities include:

- Seat Optimization
- Flight Status Notification
- EMD for instant purchase optional services
- Advanced document and PNR searching
- Plenty more — see latest download!
